Attached is a copy of the NPDES Permit issued the East Chicago Plant by the EPA, effective March 24, 1976. As you know, Du Pont's initial monthly report is due April 15. Part I C(1) requires Du Pont to submit a "Report of Progress" by June 30, 1976, outlining progress made toward achieving final effluent limitations effective December 31, 1976. J. O. McDonald transmitted the original of the Permit to Snyder and has requested that the proposed Permit of October 31, 1974, be returned to him. Please determine whether Snyder's copy of such document exists. Snyder should respond to McDonald's request, and I will be happy to help you prepare a draft of an appropriate response.
